

## *SERVICE PARK WASTE MANAGEMENT RULES:*

Let's **Go Green** Together

## RALLY DI ROMA ENVIRONMENTAL POLICY

Rally di Roma is committed to reducing the environmental impact of motorsport events, promoting sustainable practices, and raising awareness of environmental issues. In a context of growing concern about the environment and climate change, we feel a responsibility to minimize our impact and demonstrate a concrete commitment to sustainability.

By adopting green practices, Rally di Roma aims to inspire participants and other organizations to adopt similar behaviors, strengthening its reputation and attracting an increasingly environmentally conscious audience.

To achieve these goals, we are committed to:

- Minimizing waste production and, where possible, avoiding it altogether, promoting reduction, reuse, and recycling.
- Implementing separate waste collection and informing all stakeholders about the correct methods of waste disposal in all places affected by the event.
- Setting up mandatory recycling areas in the Service Park and in the Special Stages for the collection of polluting substances in special containers.
- Raising awareness among spectators about the importance of reducing environmental impact.

Together, we can contribute to a more sustainable future for motorsport and for our planet.

Rally di Roma is taking a proactive approach to minimizing its environmental impact through several key initiatives. We aim to eliminate single-use plastic cups and bottles from our event, replacing them with eco-friendly alternatives like paper cups and FIUGGI Paper bottles. Additionally, we are committed to reducing vehicle travel by promoting the use of hybrid and electric vehicles, and optimizing shared transportation options.

We encourage all participants and spectators to join us in our efforts to create a more sustainable event. Please dispose of your waste responsibly in the designated bins (compostable, recyclable, or general waste) and take any rubbish with you when spectating on the stages.

At Rally di Roma, we believe that reducing our environmental footprint is essential for protecting our planet, raising awareness about environmental issues, and promoting sustainable practices in motorsport and beyond.
