

## On-board Camera installation - Request

Competitor/Car Number

|                        |  |
|------------------------|--|
| Competitor:            |  |
| Adress:                |  |
| 1 <sup>st</sup> Driver |  |
| Phone:                 |  |
| E-mail:                |  |
| Purpose:               |  |

### In compliance with article 22.2 of “Prescrições Gerais de Automobilismo e Karting 2023”

**22.2 – On-board camera in competition cars** - its installation/use must be requested in writing to the organizer and/or promoter. Once approved, it must be communicated to the Chief Technical Scrutineer and to the Stewards, up to 60 minutes the start of the race.

In competitions/events that are part of championships for which there is an official supplier for video content, signed with FPAK, the official supplier may also request the installation of on-board cameras under the same terms and conditions as previously set out.

If the competitor uses his own on-board camera, he will be obliged to provide these images to the organizing club or FPAK, authorizing their free use, including all commercial rights or for any other purposes, considering that the competitor may be penalized if they do not do so, in accordance with Art. 12.4 of the CDI to be assigned by Stewards of the Meeting.

In competitions/events not included in FPAK championships, the supplementary regulations of the event should define the rules for on-board camera video rights.

**I, the undersigned, declare that I have taken note of the above-mentioned article and will act in accordance without any reservation.**
