Amendments to the Supplementary Regulations

18.3. Road Book and Navigation for EXTREME CARS AND EXTREME TRUCKS

ROAD BOOK

The participants in EXTREME (Cars and Trucks) will drive with a **PAPER ROAD BOOK** printed black and white.

DIGITAL ROAD BOOK - OPTIONAL

Teams in Extreme category who would like to compete using a **DIGITAL ROADBOOK** can request the **IRIS Digital Road Book and NAV-GPS**, which will be provided by the Organizer.

Requests must be sent by **10.06.2025** to email info@rallye-breslau.com. The mail has to include start number and name of the participant.

A major benefit of using the digital roadbook is that, in case of any modifications, the updated version will automatically appear in the App. This means competitors will not have to manually implement any changes themselves.

That teams using the digital roadbook will **not** receive a paper version.

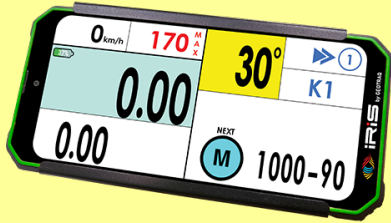

For **trucks with two navigators**, a second tablet can be requested for an **additional fee and deposit**.

SAFETY DEVICES:

- Geotraq Rally Safety System.
- IRIS Mini NAV-GPS – **only for competitors with a paper road book.**

IRIS Mini is used only for navigation and speed control. It does not replace the roadbook. The IRIS device comes with a large internal battery. It does not need to be charged during the day, and charging while riding is prohibited. After the special stage, the participant must charge the device themselves like a mobile phone, using a USB-C cable. **Important: Participants must bring their own USB-C charging cable and charger.**

The competitors must keep the devices provided by the organizer turned on and functioning during the rally.

Garmin device is NO longer required, as the IRIS system covers the same functionality.

Kind regards:
Alexander Kovatchev
Clerk of the Course
