

AL KAMEL SYSTEMS PP Tracker System

Timekeeping Services | Race Control Solutions | TV Graphics | Rally Tracking
Security Services | Road Book Services | Radio Systems | Turnkey Projects

The PP2 Tracker System provided by Al Kamel Systems is the official GPS tracking and Signaling system for Reconnaissance of the SuperCampeonato de España de Rallyes (S-CER)

1 day Reconnaissance:

- Place the device with the screen facing the user and the upper part facing the windscreen of the vehicle, directly focused on the sky and without obstructions.
- Make sure that the surface is clean so that, once the protective plastic is removed from the velcro on the back, it can be fixed.

Several days Reconnaissance:

- Place the device with the screen facing the user and the upper part facing the windscreen of the vehicle, directly focused on the sky and without obstructions.
- Make sure that the surface is clean so that, once the protective plastic is removed from the velcro on the back, it can be fixed.
- Connect the cigarette lighter plug to the vehicle to supply electrical power to the device.

- Does not require any interaction with the user
- Notifies entries and exits of stages by beeping
- Warns speed limit excesses by red flashing

Competitors who perform reconnaissance over several days must use the cigarette lighter to wall adapter overnight to recharge the device.

We solve our clients' matters.
