

SNETTERTON STAGE RALLY 2026 BULLETIN 3

Trackside damage to new turf during the event

Snetterton MSV have made us aware of recently laid new turf throughout the perimeter of the circuit. This turf has not yet fully rooted and as such is susceptible to being pulled up when cars run off the circuit.

Any turf removed or damaged by a competitor is very likely to cause a delay to the event whilst Snetterton staff repair any damage. From a safety perspective this will be undertaken to avoid subsequent competition cars from hitting a damaged section and potentially having a serious accident.

It is imperative that all competitors **DO NOT** deliberately use any of the grassed areas either side of the circuit as this is very likely to cause delays to the event as a whole. It will be down to the discretion of the organising team whether a competitor seen as deliberately going onto the grass and causing damage pays for any remediation.
