

IAME SERIES BENELUX

Appendix Stewards Bulletin 6

Procedure :

- The organizer organises fuel tanks including fuel from the designated fuel station.
- The organizer provides the brand and type of oil according the Technical Regulations.
- The bottle of oil is new and un-opened.
- After the Warm Up the mechanic must come with an empty fuel tank to Parc Fermé.
- Here he must mix the provided fuel and oil and put as many mixed fuel he wants in the fuel tank.
- The fuel tank will stay in Parc Ferme during the event.
- The nominated drivers are allowed to enter the Servicing Parc « IN » 3 minutes earlier.
- Within this three minutes the mechanic is able to put the fuel tank on the chassis.
- Tires will be handover only when the Servicing Parc « IN » is open for every driver, **not before.**
- The mechanic is allowed to do a short « Test Start » when the fuel tank is installed.
- After each sessions the fuel tank must be handover to the staff in Parc Ferme.
- The mechanic can fill the fuel tank again for the next session.
