Date: 02/05/2022

Subject: HALO homologation label and hologram

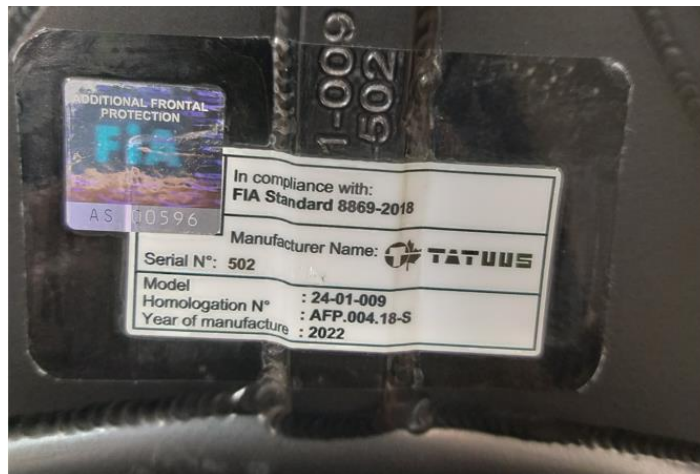

Reference

Table	Item	Part number
01-D	4	2401009

Accomplishment: Immediate

By FIA requirement the HALO must be marked with an FIA homologation label and FIA hologram. Both the label and the hologram must only be fitted by Tatuus.

The homologation label and the hologram must be visible, they cannot be covered by wrapping or paint. It is suggested to protect the homologation label and the hologram with a transparent film (i.e., helicopter tape). Please find in the picture below an example of the label and hologram fitted on the HALO, protected with 3M 8672 Tape

If the homologation label or the hologram are damaged, please get in contact with Tatuus.

It is reminded the HALO is a type 1 component, as stated by the FIA technical regulation:

“Type 1: These parts must be supplied by the manufacturer and used exactly as supplied. Repairs may be carried out only by the manufacturer.”

The adding of colour or thin adhesive film up to a thickness of 0.5 mm is not considered as a modification, provided that the colour or film fulfils only an optical function.”

By the requirements above, it is not allowed the team/customer to remove the paint from the HALO, please note, it comes from Tatuus only painted black.
